**Github:** <https://github.com/MatuAcosta>

Software engineer with over 2 years of experience in the development of web applications and other software applications. Strong ability in troubleshooting and problem-solving related to software solutions and have effectively worked in both small and large teams across multiple projects.

## PROFESSIONAL EXPERIENCE

Banco de Corrientes SA - Corrientes, Argentina

**Full Stack Developer**, May 2022 - Current

### Responsibilities

- Developed and Mantained Web "Banca Web" Application using Angular and Nodejs.
- Currently implementing new features and enhancements based on user feedback and business requirements.
- Developed a Node.js API with RabbitMQ as a queuing system for asynchronous information processing.

### Accomplishments

- Launched a web homebanking application that is currently experiencing daily growth in active users, surpassing 15,000 within the first 6 months post-launch.
- Contributed to the development of various banking projects, guaranteeing system efficiency, and user experience.

## EDUCATION

**Information Systems Engineering** at Universidad Tecnológica Nacional  
Resistencia, Argentina

Mar 2019 - Apr 2024

During my academic journey, actively participated in multiple projects that enhanced my technical and collaborative skills, but the most significant are the following:

- **Twist - Course: Final Project**
  - Built a dating app using React Native + Expo for frontend and NestJS and Spring Boot for backend. Also, used Firebase services such as Firebase Auth to manage authentication and Firestore as a database.

- **Fantur - Course: Client-Server Application Development**
  - Built a RESTful API to manage travel packages for the FIFA World Cup in Qatar 2022 using Spring Boot and MySQL.

## SKILLS

### Soft and technical
